Energy Rewards is providing this Environmental Information for Electric Power Supply Service in accordance with the Delaware Public Service Commission's Order No. 1012. Power plants can generate electricity from a number of different fuel sources, resulting in different emissions. Energy Rewards reports fuel sources and emissions to customers quarterly, allowing customers to compare data among the companies providing electricity service to Delaware.

Energy Rewards purchases Renewable Energy credits (RECs) sourced from renewable electricity generators located within the United States. The amount of RECs purchased to support the voluntary renewable component of the Everyday Green product is equal to 50% of the net electricity delivered to customers who chose Everyday Green electricity plans.

*PJM Interconnection is a regional transmission organization (RTO) that coordinates the movement of wholesale electricity in all or parts of 13 states and the District of Columbia.
